SUBJECT: Variant Text for E308PC

I'd like to employ Patterns in Popular Culture, edited by Jonna Gormely Semeiks and Harold Schechter, for my E308PC classes for the Spring 1983 semester. I've been using the book now for several semesters and have had consistently good responses from students. It employs Jungian archetypes to analyze pop culture texts. The concepts help unify the course and give students a connection to more serious works of literature. I've had one query by a fellow instructor who seemed interested in the text.

If this request needs clarification, feel free to contact me with any questions. Thank you for your time.

Sincerely,

Kirk Hampton
